Office Action Summary	Application No. 09/868,118	Applicant(s) THORNER ET AL.	
	Examiner MARYAM MONSHIPOURI	Art Unit 1656	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Instant claims fail to comply with Sequence Rules. See for example claim 27, which recites an amino acid sequence longer than 3 amino acids to which no sequence identification number is assigned. Applicant is required to comply with sequence Rules in reply to this office action (see 37 CFR section 1.821-1.825).

Also instant claims appear to be a word for word translation of a foreign language and are very difficult to understand. Applicant is advised to kindly rewrite said claims in proper English language.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-23, 35-36 and 38-43, drawn to a method of inhibiting a compound which modulates the activity of (a) a host yeast cell kinase and (b) a protein kinase from a source other than the yeast cell utilizing a host cell, modulators obtained by said method and methods of use of said modulators.

Group II, claim(s) 24-34, 37, 44-45 and 48, drawn to protein kinase derivable from yeast.

Group III, claim(s) 49, drawn to antibodies which bind said protein kinases.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical features of Group I-III are, modulators (or method of use thereof), protein kinase and antibodies, respectively, which share no structural or functional similarities.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 1656

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

A) *saccharomyces cerevisiae*, *candida*, *Histoplasma*, *Blastomyces* spp., *coccidioides* spp etc. (see every single species recited in claims 3 and 10) ;

B) PDK1, serum, SGK and PKB, Ypk1, Yrk2;

Applicant is required, in reply to this action, to elect a single species from each of Groups A-B, to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

The following claim(s) are generic: 1-49.

Art Unit: 1656

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: ***.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
